**LISTING OF CLAIMS:**

1-16. (canceled).

17. (currently amended): An adhesive plaster obtained by rolling a medical adhesive tape comprising a base film and a pressure-sensitive adhesive layer formed on one side of said base film, wherein

said base film is obtained by laminating, on each side of layer A a layer B, said layer A comprising an amorphous polyolefin, a thermoplastic elastomer and an inorganic filler selected from the group consisting of talc and zeolite, each of said layers B comprising a polypropylene-based resin, wherein one of said layers B contains a thermoplastic elastomer and the other one of said layers B does not contain a thermoplastic elastomer, and at least one of said layer A and said layer B comprising, as said thermoplastic elastomer, a polyolefin thermoplastic elastomer, and

said pressure-sensitive adhesive layer is laminated directly on ~~one of said layers~~ layer B containing the thermoplastic elastomer or on an embossed or corona-discharge treated or primer pre-treated surface of ~~one of said layers~~ layer B containing the thermoplastic elastomer.

18. (canceled).

19. (previously presented): The adhesive plaster according to claim 17, wherein said amorphous polyolefin is at least one selected from the group consisting of amorphous polypropylene and random copolymers of ethylene and/or butene-1 and propylene.

20. (previously presented): The adhesive plaster according to claim 17, wherein said layer A further comprises crystalline polyolefin.

21. (previously presented): The adhesive plaster according to claim 17, wherein said thermoplastic elastomer is an ethylene-butene copolymer and/or a styrene-butadiene copolymer.

22. (previously presented): The adhesive plaster according to claim 17, wherein the polypropylene-based resin of each of said layers B is ethylene-containing random polypropylene.

23. (previously presented): The adhesive plaster according to claim 17, wherein said layer A has a thickness of 10 to 100  $\mu\text{m}$ .

24. (previously presented): The adhesive plaster according to claim 17, wherein each of said layers B has a thickness of 2 to 20  $\mu\text{m}$ .

25. (previously presented): The adhesive plaster according to claim 17, wherein the surface of said base film is embossed, subjected to corona discharge treatment or treated with a primer.

26. (previously presented): The adhesive plaster according to claim 17, wherein said pressure-sensitive adhesive layer is formed on an embossed or corona-discharge treated or primer pre-treated surface.

27. (previously presented): The adhesive plaster according to claim 17, wherein said polyolefin thermoplastic elastomer is an ethylene-butene copolymer.
